EDUCATION

B V Raju Institute of Technology, JNTU Hyderabad **Hyderabad, India**

Bachelor of Technology (b.tech) in computer science and engineering *2023-2027*

Cumulative GPA – 8.22/10.0 *(pursuing)*

PROJECTS

Smart Wearable System for Internal Bleeding Detection

Developed a Flutter-based mobile application for real-time monitoring of vital health parameters

- Monitored **SpO_2, heart rate, hemoglobin, and blood pressure** using wearable data
- Developed a **risk classification algorithm** for early detection of internal bleeding
- Enabled **real-time, non-invasive health** monitoring and alert system
- Integrated **wearable sensor data** for real-time health monitoring and analysis
- Project showcased at a hackathon; **Link: LinkedIn**

Deepfake Detection System (IEEE Published)

Built a deep learning-based image classification system using XceptionNet, SVM, and Autoencoder GAN (AGAN)

- Performed **feature extraction, anomaly detection, and model evaluation** on image datasets
- Achieved **~99% validation accuracy and ~93% test accuracy**
- Applied **data preprocessing, augmentation, and classification techniques**
- **Developed computer vision and deep learning models** for real-world AI security
- **Link: LinkedIn**

Hospital AI Chatbot for Patient Data Analysis

Developed a Flask-based AI chatbot to analyze structured healthcare datasets using NLP

- Implemented **data validation (missing values, duplicates, data types)** before processing
- Enabled **natural language querying and dynamic question answering**
- Integrated **data visualization (Matplotlib**) for patient vitals
- Built backend logic and improved **data accessibility through REST-based processing**
- **Link: LinkedIn**

SKILLS

- **Languages**: Python, Java, C, SQL
- **Libraries/Frameworks:** Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, Flask**,** Seaborn
- **Core Concepts:** Machine Learning, Deep Learning, Computer Vision, NLP, Data Structures & Algorithms, Object-Oriented Programming
- **Data Skills:** Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering, Model Evaluation
- **Tools:** VS Code, Jupyter Notebook, Git, GitHub, REST APIs

ACHIEVEMENTS

- **AI/ML in Geospatial Data Analysis** – IIRS
- **Machine Learning (Regression & Classification)** – Stanford University (Coursera)
- **Introduction to Artificial Intelligence** – Infosys Springboard

EXTRA-CURRICULAR ACTIVITIES

- IEEE Publication: Published research on "Deepfake Detection using Deep Learning" at ICSCSA 2025, focusing on hybrid ML models for image classification **[Paper]**
- Participated in **PROMETHEAN 2025 Hackathon**, collaborating in a team to design and develop innovative technology solutions under strict time constraints
- Developed **"BleedSense"** health-tech project during HACKFINITI National-Level Hackathon, focusing on early detection of internal bleeding using wearable data
- Demonstrated skills in problem-solving, rapid prototyping, and effective team collaboration across projects and hackathons
